pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

A cDNA clone (AAR13320) coding for cucumber expansin 29 (AAR94527) has been obtd. Expansins can be used e.g. in the mfr., de-inking and recycling of paper, in the textile industry, to aid delignification processes, to alter gel

expansin S1 precursor - cucumber
C;Species: Cucumis sativus (cucumber)
C;Date: 16-Jul-1999 #sequence_revision 16-Jul-1999 #text_change 21-Jul-2000
C;Accession: T10079
R;Scherban, T.Y.; Shi, J.; Durachko, D.M.; Guiltinan, M.J.; McQueen-Mason, S.J.; Shieh, Proc. Natl. Acad. Sci. U.S.A. 92, 9245-9249, 1995
A;Title: Molecular cloning and sequence analysis of expansins--a highly conserved, multi A;Reference number: Z14894; MUID:96016146
A;Accession: T10079
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: mRNA
A;Residues: 1-250 <SHC>
A;Cross-references: EMBL:U30382; NID:g1040874; PIDN:AAB37746.1; PID:g1040875
A;Experimental source: cultivar Burpee Pickler
C;Genetics:
A;Gene: EXP1
C;Function:
A;Description: mediates cell wall extension
C;Superfamily: expansin
F;1-23/Domain: signal sequence #status predicted <MAT>
F;24-250/Product: expansin #status predicted <MAT>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   expansin (clone pPtexp4) - loblolly pine (fragment)
